## EDUCATION

### OSMANIA UNIVERSITY

BSC IN COMPUTER SCIENC

CGPA:8.1

2021 - 2024 | Hyderabad, Telangana

## COURSEWORK

### FREECODECAMP.ORG

Jun 2025-

Dec 2025

Completed "100xdevs" course, gaining expertise in MERN stack development, basic DevOps principles, version control with Git, backend fundamentals, and WebRTC technology for real-time communication applications.

- costum hooks • graph.QL • redis

### GRADUATE

Object-Oriented Programming (OOP) using C++

data structures and algorithms in c++  
database management system

Object-Oriented Programming (OOP) using java  
python

## ACHIEVEMENTS

2019 Fist Price chess competition

2018 Fist Price chess competition

## EXPERIENCE

### FREELANCE DEVELOPER

- Jan 2025 – Present | Remote
- Developed end-to-end web and native applications using React, Next.js, Prisma, Firebase, React Native, Supabase, SQL, and Tailwind CSS based on client requirements.
  - Received excellent feedback from clients for delivering high-quality, efficient, and user-friendly projects.

### NEXUI | DEVELOPER & FOUNDER

Jan 2024 – Dec 2024 | Hyderabad - Part-time

- Established and led the development of a comprehensive animated UI components library, facilitating streamlined and efficient development processes.
- Simplified coding workflows for developers by providing pre-built UI components, eliminating the need to start from scratch and accelerating project timelines.

### WECODE WEB DEVELOPMENT INTERN

Jan 2023 – Apr 2023 | Hyderabad

- Enhanced UI for improved student interaction with the website.
- Optimized backend performance, increasing website speed and efficiency.

## PROJECTS

### AI TRIP PLANNER

Project-Link:// AI\_Trip\_Planner

- Developed an AI-powered travel planning platform that generates personalized itineraries based on user preferences, budget, and trip duration.
- Built using Next.js, Convex, and modern UI components to deliver a fast, interactive, and intuitive user experience.
- Integrated real-time suggestions and dynamic route planning for seamless travel decision-making.

### AI MEDICAL VOICE AGENT

Project-Link:// AI Medical Voice Agent

- Engineered a voice-driven medical assistant capable of understanding patient queries using advanced speech-to-text and LLM-based reasoning.
- Implemented doctor lookups, appointment suggestions, and medical Q&A workflows to improve healthcare accessibility.
- Built with Next.js, Drizzle ORM, and ShadCN UI to deliver smooth interactions and scalable backend logic.

### AI CAR MARKETPLACE

Project-Link:// AI Car Marketplace

- Built a full-stack AI-driven marketplace enabling users to list, browse, and compare vehicles enhanced with AI-generated insights.
- Leveraged Supabase, Prisma, and Clerk authentication to create a secure and robust user management and database system.
- Integrated Gemini AI for intelligent recommendations, automated descriptions, and enhanced vehicle search workflows.
